

Academic Programme

Saturday, December 28 (Day 1)

Time	Speaker	Title	Chair
09:30-10:00	Opening Ceremony		
10:00-11:00	S. Ponnusamy	Univalent harmonic mappings	X. Wang
11:00-11:20	High Tea & Snacks		
11:20-12:05	G. Bharali	Invariant pseudometrics and their role in a Pick–Nevanlinna-type problem	S. Ponnusamy
12:10-12:55	X. Wang	On the quasisymmetry of quasiconformal mappings and its applications	
13:00-14:00	Lunch		
14:00-14:25	K. S. Charak	Bloch Principal and counter examples	G. Bharali
14:30-14:55	Bappaditya Bhowmik	Inequalities for the coefficients of meromorphic starlike functions with nonzero pole	
15:00-15:20	Tea & Snacks		
15:20-15:40	Sairam Kaliraj	Univalent harmonic mappings convex in one direction	M. Huang
15:45-16:05	V. A. Chougule	Properties of subclass of univalent function using linear operators	
16:10-16:30	S. V. Bharanedhar	Remarks on the univalence criterion of Pascu	
16:35-16:55	V. Srinivas	On certain classes of meromorphic functions
